OBJECTIVE

Aspiring Data Engineer with strong foundations in Java, SQL, and backend system design, expanding expertise toward large-scale data processing using Python and PySpark on AWS. Interested in building reliable, scalable ETL pipelines, optimizing data workflows, and enabling analytical decision-making across business functions.

EDUCATION

B.Tech in Computer Science (CSE-AIML)	2021-2025
TKR COLLEGE OF ENGINEERING AND TECHNOLOGY, Hyderabad, Telangana	CGPA 7.68

TECHNICAL SKILLS

Languages	Python, SQL, Java Hibernate, JPA
Data Engineering and Processing	PySpark, ETL Pipelines, Data Cleaning, Data Transformation
Databases and Warehousing	MySQL, AWS RDS, Query Optimization, Joins, Indexing, Aggregation
Cloud Technologies	AWS S3, EC2, IAM, CloudWatch
Data Formats	CSV, JSON, Parquet
Development Practices	SDLC, Version Control, Basic CI/CD

PROJECTS

Interview Management System — Java, Spring Boot, Hibernate, MySQL

- Built role-based dashboards for recruiters and candidates using React functional components and Hooks.
- Built secure JWT authentication with ProtectedRoute components for candidate/recruiter dashboards.

Sales Data ETL Pipeline — Python, PySpark, AWS S3, SQL

- Engineered an end-to-end ETL workflow to ingest raw sales records, perform validation, cleansing, deduplication, and transformation using distributed PySpark processing.
- Produced analytics-ready datasets stored as partitioned Parquet files, enabling efficient SQL queries for revenue trends, top-selling products, and regional performance metrics.

Plant Disease Detection – Backend Integration (API Integration)

- Created a React-based user interface for uploading plant images and viewing prediction results. ML prediction APIs and displayed structured results dynamically on the UI.

CERTIFICATIONS & ACHIEVEMENTS

- Java (Basic), Python (Basic), MySQL (Basic) – HackerRank
- Certificate of Excellence – Employment Skills Level 1
- Hackathon Participant – TKR Hack Conquest 1.0

CLOUD & DEVOPS EXPERIENCE

- Deployed Spring Boot applications on AWS EC2.
- Configured CI/CD pipelines using GitHub Actions for automated build and deployment.
- Containerized applications using Docker for environment consistency.
