
Profile Summary

Data Analyst with expertise in data analysis, visualization, and problem-solving. Proven ability to extract actionable insights from complex datasets, driving operational efficiency and strategic decision-making. Ready to bring analytical skills and innovative solutions to a dynamic analytics team.

Education

Electronics and Communication Engineering (E.C.E)	2020-2024
Matrusri Engineering College, Hyderabad, Telangana	8.0

Skills

- **Data Analysis Tools:** MS Excel, SQL, Power BI, Python
- **Soft Skills:** Analytical Thinking, Critical Thinking
- **Developer Tools:** Git, GitHub

Projects

Dynamic Retail Dashboard | EXCEL | [View Project](#)

- Designed to provide a comprehensive, interactive tool for analyzing retail data.
- Uncovering key insights, and making informed business decisions.
- The dashboard is designed to integrate various datasets, visualize KPIs (Key Performance Indicators).
- Offer a user-friendly interface for tracking performance across multiple dimensions such as sales, profit, discounts and orders.
- Analysing data from multiple sources, the dashboard enables stakeholders to make informed decisions.
- Automating data visualization and analysis reduces manual effort and improves operational efficiency.

User's interactions on different pages | SQL | [View Project](#)

- Users are interacting with type of interactions like page view, add to click, add to impression on different pages through the user id.
- Users are interacting with type of interactions through the user id.
- Users are interacting with type of interactions on different pages through the page id.
- Analyze the user behaviour through the user id.
- Identified by each user number of times interacting through the count (user id).

- Users are visited the pages through the visit id.
- Users are interacting with valid pages through the page id.

Sales Dashboard | Power BI | [View Project](#)

- Designed and developed an interactive **Sales Dashboard** to analyze overall sales performance.
- Tracked **key KPIs** such as *Total Sales* and *Profit Percentage* for performance measurement.
- Built **Monthly Sales Trend** visuals to monitor revenue fluctuations over time.
- Conducted **Regional and Product-wise analysis** to identify top-performing areas and products.
- Utilized **Power BI** for data modeling and visualization, and **Excel** for data cleaning and preprocessing.
- Derived insights that supported **data-driven decision-making** and improved business understanding.
