SUMMARY

Backend-focused Full-Stack Software Engineer (2025 Fresher) with 1+ year of project experience building scalable systems using Java, Spring Boot, and REST APIs. Strong in distributed systems, data structures, low-level design, and cloud deployment (AWS). Built 3 production-quality projects with microservices, CI/CD pipelines, and AI/ML integrations.

EDUCATION

B.Tech in Computer Science (CSE-AIML)	2021 – 2025
TKR College of Engineering and Technology, Hyderabad	CGPA: 7.68/10

TECHNICAL SKILLS

Languages	Java (Advanced), SQL, JavaScript, TypeScript, GoLang (Learning)
Backend	Spring Boot, REST APIs, Microservices, Hibernate, JPA, Concurrent Programming
Frontend	React.js, HTML5, CSS3
Databases	PostgreSQL, MySQL, Query Optimization, Indexing, Stored Procedures
Security & Cloud	Spring Security, JWT, OAuth2, AWS (EC2, S3, IAM, CloudWatch)
Tools & Systems	Git, Docker, CI/CD (GitHub Actions), Linux/Unix, TCP/IP, Agile (Scrum)
CS Fundamentals	Data Structures & Algorithms, Low-Level Design, System Design, Design Patterns

PROJECTS

AI Interview Management & ATS Resume System	Jan 2024 – May 2024
<i>React, Spring Boot, Python NLP, PostgreSQL, Docker, AWS EC2</i>	github.com/softwareuday

- Architected 5+ microservices covering resume parsing, NLP-based ATS scoring, and interview automation; processed 100+ candidate profiles with 85%+ keyword extraction accuracy.
- Designed 15+ secured REST API endpoints (JWT + Spring Security) and deployed on AWS EC2 with GitHub Actions CI/CD, cutting deployment time to under 5 minutes.

AI Financial Management System	Jul 2024 – Nov 2024
<i>React, Spring Boot, PySpark, PostgreSQL, AWS</i>	

- Built PySpark data pipelines processing 10,000+ daily transactions for real-time spending pattern detection and forecasting with 90%+ pipeline reliability.
- Implemented OAuth2-secured REST APIs supporting multi-user dashboards with sub-300ms average response time under load.

Plant Disease Detection System	Sep 2023 – Dec 2023
<i>React, Spring Boot, ML API Integration</i>	

- Integrated 3 ML classification APIs for prediction across 10+ disease categories; structured error handling reduced API failure rate by 40% during load testing.

CORE COMPETENCIES

- Solved 150+ DSA problems (arrays, trees, graphs, DP) on LeetCode/HackerRank; applied OOP design patterns (Singleton, Factory, Strategy, Observer) across all 3 projects.
- Diagnosed and resolved 3 critical concurrency bugs in Spring Boot multi-threaded request handling; strong in debugging, root cause analysis, and performance optimization.

CERTIFICATIONS & ACHIEVEMENTS

- Java, Python, MySQL – HackerRank Certifications (2023) | Certificate of Excellence – Employment Skills Level 1 (2024)
- Hackathon Participant – TKR Hack Conquest 1.0 (2024), Top 20 qualifying teams
