OBJECTIVE

Full-Stack Developer with hands-on experience building scalable RESTful services using Java, Spring Boot, and modern frontend frameworks like React. Strong in API optimization and responsive UI development. Passionate about building reliable, high-performance end-to-end applications.

EDUCATION

B.Tech in Computer Science (CSE-AIML)	2021-2025
TKR COLLEGE OF ENGINEERING AND TECHNOLOGY, Hyderabad, Telangana	CGPA 7.68

TECHNICAL SKILLS

Languages	Java, Python(Basics)
Backend Development	Spring Boot, Spring MVC, RESTful APIs, Hibernate, JPA, Microservices (basic)
Frontend Development	HTML,CSS,JavaScript,React.js
Databases	MySQL, SQL (Joins, Indexing, Normalization, CRUD Operations)
Engineering Practices	JUnit, Logging, Exception Handling, SDLC, Debugging
Core CS Concepts	Data Structures and Algorithms, OOP, Multithreading, OS Fundamentals
Tools & Utilities	Git, GitHub, Maven, Postman, IntelliJ IDEA

PROJECTS

Interview Management System — Java, Spring Boot, Hibernate, MySQL

- Built scalable REST APIs for interview workflows, improving system availability and request performance.
- Built secure JWT authentication with ProtectedRoute components for candidate/recruiter dashboards.

Employee Payroll System – Backend Services (Java, Spring Boot, MySQL)

- Developed backend services for employee onboarding and salary processing using Spring Boot and MySQL.
- Implemented input validation, exception handling, and database persistence following SDLC best practices.

Plant Disease Detection – Backend Integration (API Integration)

- Designed backend APIs to handle image input for ML prediction workflows.
- Managed payload validation, structured JSON responses, and result storage.

CERTIFICATIONS & ACHIEVEMENTS

- Java (Basic), Python (Basic), MySQL (Basic) – HackerRank
- Certificate of Excellence – Employment Skills Level 1
- Hackathon Participant – TKR Hack Conquest 1.0

CLOUD & DEVOPS EXPERIENCE

- Deployed Spring Boot applications on AWS EC2.
- Configured CI/CD pipelines using GitHub Actions for automated build and deployment.
- Containerized applications using Docker for environment consistency.
- Used AWS CloudWatch for basic log monitoring and diagnostics.
